BALCONY PETUNIAS

Few of the annuals offered by us have become as popular as this simple yet splendid type of Petunia. Their freedom and purity of bloom have made them become exceedingly popular, not only for window-boxes but for borders, beds, and rock-gardens. Few, if any, of the Petunias bloom as luxuriously as this lovely type. The flowers are of good size, the plants are vigorous growers, and the colors are pure and true. We offer five distinct colors of this very popular annual.

MINIATURE REPRODUCTION OF FREE WINDOW STRIP

Greenwood Formula Lawn Grass Seed

After several years of careful experimenting, we have developed this formula to a point where we offer it without hesitancy to the general public through dealers as "A Stumpp & Walter Co. Product." The quality is satisfactory in every respect, containing only recleaned grasses (no Timothy) that will produce desired results. For your protection, we have registered the name with the U. S. Patent Office.

GREENWOOD is strictly a first-class formula. The ingredients are well balanced and designed to fill a two-fold need: (*a*) for the dealer who aims to supply quality goods in bulk or containers, and (*b*) the landscape man who is anxious to sow a mixture that he knows is made up of Grasses with highest tests and remachined for elimination of weeds. In spite of its superfine quality the price is right, namely,

1-lb. cartons (50 to a case) (Retail selling price 50 cts. each)	$14.00 per case
5-lb. bags (10 to a case) (Retail selling price $2.25 each)	13.50 per case
100-lb. bags	24.00 per 100 lbs.
500 lbs.	115.00 per 500 lbs.
1,000 lbs.	220.00 per 1,000 lbs.
2,000 lbs.	420.00 per 2,000 lbs.

High-Grade CENTRAL PARK Lawn Seed

Many of the leading dealers throughout the country are beginning to realize that it is necessary to merchandise a better quality of Lawn Seed than in the past. Frequently as much as 85 cents per pound is charged, which is not exorbitant where the quality is very high. Most Lawn Mixtures average only 8 ounces to the quart; we are offering a high-quality Lawn Seed which runs 22 pounds to the bushel.

Our new Headquarters: 132–138 Church St. (at Warren), New York City

OUR NEW BUILDING IS EFFICIENT

It is Designed Especially for Our Business

The United States Government has taken over our old location at 30 and 32 Barclay Street and 40 Vesey Street, New York. The entire block, of which our old store and warehouse form a part, will be occupied by a new post office to be erected there.

So we had to move, and we selected the corner of Church and Warren Streets, three short blocks to the north. Here we have erected a nine-floor building, planned exactly to fit our needs, and we have made it one of the most modern seed, bulb, and garden-supply establishments in the country.

Each floor has an area of 5000 square feet, giving us ample storage space, while express elevator installations will enable us to make our shipments with the utmost speed. Thus, we can take advantage of our close proximity to all important freight and express terminals and steamship piers; you may rely upon shipment the same day your order is received.

Our sales department, with display windows on both Church and Warren Streets, will be one of the largest, as well as one of the most attractive seed-stores in the country.

We hope you will visit us in our new quarters after February 1. We are easy to find. If driving, we are a short run south of the Holland Tunnels, and, as before, only a block from Broadway; we still are near the Woolworth Building, one of the downtown landmarks.

The B. M. T., Seventh Avenue and new Eighth Avenue subways have stations very close to Church and Warren Streets, as also have the Sixth and Ninth Avenue elevated roads. Brooklyn Bridge, with its subway, elevated, and trolleys is but a short walk away.

LOWER PRICES

The 1931 seed harvest was mostly an abundant one, and our production costs have been reduced somewhat. We are glad to be able to pass these savings along to our customers, and would draw attention to the reduced prices of many vegetable and flower seeds, grass seeds, and bulbs in this Catalogue.

TERMS OF BUSINESS

Delivery.—When cash accompanies order, we deliver by truck, mail, express, or freight, at our option, all Vegetable and Flower Seeds. Customer pays transportation on Bulbs, Grass Seeds, Field Seeds, Implements, Fertilizers, Plants, and Potatoes.

Terms.—It is always a pleasure to open charge accounts with parties of approved credit, basis of 60 days net. Three per cent discount allowed for cash with order.

Packing.—We make no charges for cases or packing, only for cotton and burlap bags; these we invoice at cost and make full allowance when returned, prepaid, in good condition.

Remittances should be made by Draft on Bank, Post-Office Order, Registered Letter, or Express Money Order. Particular care is essential in having name, post office, county, and state distinctly written; we are in receipt of many orders deficient in these important particulars.

Non-Warranty.—We, Stumpp & Walter Co., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants we send out, and will not be responsible for the crop.

Bountiful Beans

Early Giant Bush Lima Beans

New York Market Broccoli

S. & W. Co.'s Novelties and

Super Stocks

While pages 2, 3, 4, and 5 include some distinct novelties in Vegetables, they list essentially the unusually meritorious stocks of standard varieties for the market-growers—strains that have met with increased favor each season—and we hope that you will compare them with stocks you are now using.

Fordhook Bush Lima Bean

Long Island Grown Seed

While we can offer only in limited quantities, we have developed on our farm on Long Island an improved stock of the Fordhook Bush Lima. The pods are longer, are better filled, and the plants vigorous. Being acclimated to weather conditions of New York, they will yield a better crop. **5 lbs. $2.25, 15 lbs. $6, bus. (60 lbs.) $21.**

Early Giant Bush Lima Bean

A quick-growing variety The short period in which this Bean matures enables it to be *grown for succession*, sowings being made from May 15 to July 10 in the neighborhood of New York. Othe: varieties of Lima Beans take so long to mature that more than one seeding is barely practicable with them. The flavor of this variety is particularly refined, and the fine, luscious Beans, which are large, thick, and flat, are produced in remarkable quantity. **5 lbs. $2, 15 lbs. $5, bus. (60 lbs.) $18, 10 bus. $170.**

Copenhagen Market Cabbage

Bountiful Bean

A popular market-grower's variety that is stringless. The best flat-podded Bean, very prolific and a continuous bearer. It is tender and of delicious flavor, as stringless as the breeder has been able to make a flat-podded Bean, which means that the pods are stringless until they reach a length of 5 inches. Our stock has been grown specially for seed stock. **5 lbs. $1.35, 15 lbs. $3.50, bus. (60 lbs.) $10, 10 bus. $90.**

Asgrow Valentine Bean (New)

A stringless Black Valentine Bean. It has all the fine merits of Black Valentine, being quick-growing, hardy, prolific, and a good shipper, but stringless. This Bean is sure to become very popular. Only limited quantities available this year. **2 lbs. $1.25, 5 lbs. $2.25, 15 lbs. $6, bus. (60 lbs.) $20.**

Sure Crop Stringless Wax Bean

This is a new Bean of fine quality. It produces quickly a supply of thick, flat, golden yellow pods that are entirely stringless. The plants are of medium size. Seeds black. **5 lbs. $1.50, 15 lbs. $3.65, bus. (60 lbs.) $12, 10 bus. $110.**

Early Wonder Beet

A variety which has gained wide popularity among market-gardeners. It may be sown early, and it matures very rapidly. It is so uniform in growth that the crop can be lifted practically at one time, yielding the land early and quickly for the second crop. The root is nearly globular in shape, slightly flattened. The leaves are of medium size, and the color of the flesh is deep blood-red. **Oz. 20 cts., ¼lb. 50 cts., lb. $1.35, 10 lbs. $12.50.**

New York Market Broccoli

(True Italian Strain)

The sprouting Broccolis furnish delicious boiling greens during summer, autumn, and early winter. The very choice variety which we offer has green, tender shoots, and each plant produces an abundance of firm heads. Cultivation is the same as that for cabbage, sowing from March to early July, transplanting later, 2 feet or more apart. Broccoli is preferred by many to cauliflower. **RESELECTED STOCK, ¼oz. $1, ½oz. $1.75, oz. $3, ¼lb. $10. Imported seed of proved quality, ½oz. $1, oz. $1.75, ¼lb. $4.50, lb. $15.**

Copenhagen Market Cabbage

The best of all early Cabbages. Stands longer without bursting than other early sorts. The stem is short, the head round and solid. When ready for cutting, Copenhagen Market is the heaviest of the extra-early varieties, and if left until fully mature, frequently weighs 8 to 10 pounds. The leaves are small, compact, and close to the head, so it will stand close planting. The inside is fine-grained, tender, pure white, and compact. A leader. **½oz. 45 cts., oz. 80 cts., ¼lb. $2, lb. $6.**

Celeriac, New York Improved

A good clean bulb, smooth, free from fibrous roots, and uniform in shape. This fine type is the selection of a well-known market-gardener in the New York district and is grown for us exclusively. **Oz. 55 cts., ¼lb. $1.50, lb. $4.**

Bokay Celery | Golden Plume Celery | Rubicore Carrot | Midget Sweet Corn | Sicilian Fennel

Specialties in Vegetable Seeds

Rubicore Carrot (New)

A superior strain of Chantenay with small red cores which are nearly the same color as the flesh, giving it the general appearance of being coreless. Tops are shorter than regular Chantenay, but strong enough to bunch easily. Roots are 5½ to 6 inches in length, 2 to 2½ inches at the shoulder, narrowing gradually to a blunt end. Rubicore is smooth, free from side rootlets, tender, sweet, of fine flavor and excellent table quality. This Carrot is sure to bring a premium in the market. Excellent for canners, market-growers, and shippers. **Oz. 35 cts., ¼lb. 90 cts., lb. $2.50.**

Perfection Carrot

A fine variety for late summer and fall marketing. It is of deep orange color, practically coreless, cylindrical in shape, about 7 to 8 inches long, with tops short but good for bunching. **Oz. 20 cts., ¼lb. 55 cts., lb. $1.50, 10 lbs. $14.**

The Best Early Cauliflower, S. & W. Co.'s Best of All

The easiest grown and surest heading Cauliflower offered today. In habit the plant is very dwarf, stocky, and erect. It has very few outer leaves and, as a consequence, the young Cauliflower plants may be planted less than 2 feet apart each way. All that is necessary is to select suitable soil, when every plant will form a large, solid, perfect head of the finest table quality and of handsome appearance. **⅛oz. 85 cts., ¼oz. $1.50, ½oz. $2.50, oz. $4.**

New Celery, Bokay

Our New Introduction to Celery-Growers

Exhaustive tests have proved this to be the finest green Celery on the market today. Bokay has been developed from our Earligreen. The ribs are about the same length as our Golden Plume (which we also introduced), and are more fleshy and rounder than the Easy-Blanching. It has a good golden heart and the bouquet effect of the green ribs with the beautiful heart induced us to name this new variety Bokay. Bokay is hardy, withstanding frost and drought better than other varieties, and you will find it a very desirable sort for the trade wanting a good green Celery without bleaching. Bokay has good height, making it desirable for shipping in crates. **Pkt. 25 cts., ¼oz. 75 cts., ½oz. $1.35, oz. $2.50, ¼lb. $7.50, lb. $25.**

Golden Plume Celery

Golden Plume Celery fills a want that both amateur and professional gardeners have long felt. It is a much-improved form of Golden Self-Blanching, and the improvements are (*a*) superior eating quality, (*b*) wonderful golden color, (*c*) marked resistance to blight and rust, (*d*) earlier maturity, (*e*) superior keeping qualities, (*f*) increased size. It possesses a fine, nut-like flavor, and is handsome in appearance. We offer the **Raiser's original strain. Pkt. 25 cts., ¼oz. $1, ½oz. $1.75, oz. $3, ¼lb. $9, lb. $30. Home-grown seed of Golden Plume, pkt. 15 cts., ½oz. $1, oz. $1.50, ¼lb. $4.50, lb. $15.**

Golden Gem Corn

The earliest golden Corn on the market. It is at least two weeks earlier than Golden Bantam, with ears a trifle larger but of same fine eating quality. **½lb. 30 cts., lb. 55 cts., 2 lbs. $1, 5 lbs. $2.25.**

S. & W. Co.'s Midget Sweet Corn

A miniature Sweet Corn that is markedly suitable for growth in pots, and adapted for culture under glass. The tiny plant grows about 30 inches, the ears are only 3 to 4 inches long, but from two to five of these petite ears are on a single stalk. The ears are of fine quality—the kernels white, meaty, and very sweet, while the cob is small. A decided novelty. **Pkt. 20 cts., oz. 35 cts., ¼lb. 90 cts.**

Full-Hearted Endive (*Escarolle*)

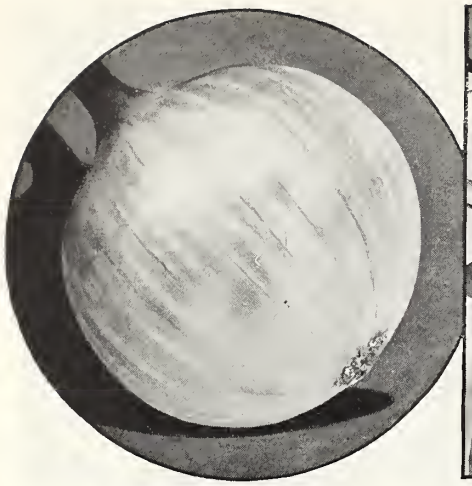
The Full-Hearted closely resembles the Broad-leaved Batavian, with broad and thick leaves, twisted and waved, with round ends, and of a bright deep green, with nearly white midrib. The head, however, is more compact and is full, blanching easily to a creamy white. **Oz. 25 cts., ¼lb. 60 cts., lb. $1.65.**

Early White Vienna Kohlrabi

Short-Leaved Type

A handsome early type with very few small leaves, seldom over 8 inches long. The "bulb" is of medium size and fine quality, large enough to be eaten in ten weeks from the time of sowing. The small size of the plant makes this variety particularly valuable for growth under glass as well as in the open ground. **Oz. 35 cts., ¼lb. 95 cts., lb. $2.75, 10 lbs. $25.**

S. & W. Co.'s Best of All Cauliflower



Southport White Globe Onion

Eight Weeks Pea

Ruby King Pepper

S. & W. Co.'s Hardy Curled Parsley

Dwarf Green-Curled Scotch Kale

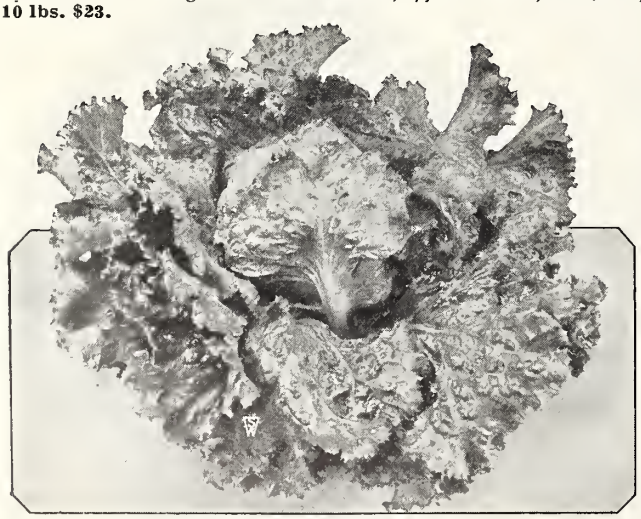
A variety extensively grown for the large markets. The special strain that we offer is a splendid curled type, extremely even, very dwarf and spreading, and of beautiful color. **Oz. 20 cts., ¼lb. 45 cts., lb. $1.25.**

Three Special Strains of Lettuce

Big Boston. (White seed.) A splendid head Lettuce, perhaps the most generally and favorably known of the varieties offered today. Forced in frames to great extent in the spring and is also planted in August for late crop. Does not do well for midsummer use, but as a fall or early spring Lettuce is one of the best. Large heads; center crisp and of fine flavor. **Oz. 20 cts., ¼lb. 55 cts., lb. $1.40, 10 lbs. $13.**

New York, or Wonderful. Possibly the largest Lettuce in cultivation. It is so distinct that, with its crisply curled leaves, very dark color, and remarkable size, a row of New York frequently puzzles even the experienced grower if unacquainted with this variety—at first glance he is likely to wonder what kind of a plant he is looking at. New York is a sure-heading variety, suitable both for spring and late summer planting; the big, compact, white heads are of the best possible quality. The heart is large, white, crisp and very compact. New York, or Wonderful needs 50 per cent more room in which to grow than varieties of the usual type. Many shippers refer to this as "Iceberg." **Oz. 35 cts., ¼lb. 95 cts., lb. $2.75, 10 lbs. $25.**

Trianon Self-Closing Cos. A large, strictly self-folding type with long, narrow, oval leaves. The oval head is tender and crisp. Trianon is several days earlier than other varieties of Romaine, making it of value to the commercial man. This is a special strain that has been found suitable by the New York growers. **Oz. 35 cts., ¼lb. 90 cts., lb. $2.50, 10 lbs. $23.**



New York or Wonderful Lettuce

Southport White Globe Onion

Yields abundantly, producing handsome and uniformly globe-shaped bulbs. The flesh is firm, fine-grained and of mild flavor. To produce the beautifully white Onions, so much sought in every market, one must, first of all, have good seed; second, grow them well on rich land; third, exercise great care in harvesting and curing the crop. We have, by years of careful selection and breeding, developed a strain which has no equal in uniformity and beauty of shape and color. **½oz. 25 cts., oz. 40 cts., ¼lb. $1.15, lb. $3.25, 10 lbs. $31.50.**

Riverside Sweet Spanish Onion

The largest, sweetest, best-keeping, and most uniform of the Spanish group of Onions. It is globular, with golden yellow skin and mild white flesh. A good, profitable variety in sections with long seasons and deep, rich soil. **Oz. 45 cts., ¼lb. $1.50, lb. $4.50.**

S. & W. Co.'s Hardy Curled Parsley

This is of European origin and is produced for us under most rigorous northern conditions. It is medium finely curled, very uniform, and of robust, stocky growth. It is of remarkably fine, deep color, and it stands frost better than any type we know; it should be used especially for standing on into winter. **Oz. 20 cts., ¼lb. 45 cts., lb. $1.25, 10 lbs. $12.**

Hamburg Turnip-rooted Parsley

The root resembles the parsnip and may be stored for winter use. The leaves are quite similar to plain Parsley, and are used extensively for flavoring soups, etc. Our stock produces half-long smooth roots. **Oz. 15 cts., ¼lb. 45 cts., lb. $1.10, 10 lbs. $10.**

Two Good Peas

Eight Weeks. A remarkable super-first-early round-seeded Pea, 1½ feet high. It may be sown on a warm border when snow is still present in other parts of the garden; the result will be Peas *weeks* before those obtained from main seedlings. **5 lbs. $1.35, 15 lbs. $3.65, 60 lbs. (bus.) $13.**

World's Record. Among early main-crop Peas of medium height, Gradus, or Prosperity, takes first place; happily named, indeed, on account of its high yield and superb flavor. In World's Record these points are more than maintained; the yield is as high and the quality, if anything, is enhanced. The great point in favor of the new sort is its *earliness*. **5 lbs. $1.25, 15 lbs. $3.25, 56 lbs. (bus.) $12, 10 bus. $110.**

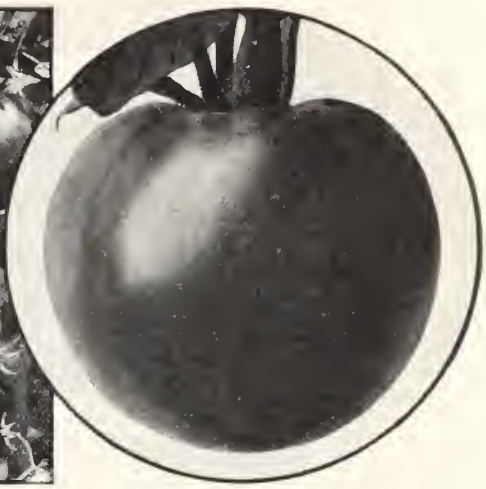
Ruby King Pepper

The handsome fruits are 4½ to 6 inches long, 4 inches thick, and bright red. Ruby King is used very largely for pickles, and it is equally suited for slicing. The flavor of the fruits is mild and pleasant, with just a slight suspicion of piquancy. **½oz. 35 cts., oz. 60 cts., ¼lb. $1.50, lb. $4.**

Scarlet Globe Radish

White-Tip Sparkler Radish

Essex Wonder Tomato



Marglobe Tomato

Early Scarlet Globe Radish

Seed Grown from Transplanted Roots

We offer a specially refined stock of this Radish that will please you. It is of uniform globe shape, bright attractive scarlet color, and moderately small top. One of the most popular Radishes for commercial growth outdoors or for forcing under glass. **Oz. 15 cts., ¼lb. 40 cts., lb. $1, 10 lbs. $9.50, 100 lbs. $85.**

White-Tip Sparkler Radish

Seed Grown from Transplanted Roots

Most dainty in appearance; the upper half of the root is bright scarlet and the lower portion pure white. The two colors are sharply defined and do not merge into each other, as in ordinary white-tipped Radishes. **Oz. 15 cts., ¼lb. 40 cts., lb. $1, 10 lbs. $9.50, 100 lbs. $85.**

Market-Gardener's Sorrel

A type developed by a New York market-grower, and found specially suitable for metropolitan trade. A narrow-leaf variety. **Oz. 55 cts., ¼lb. $1.50, lb. $4, 10 lbs. $37.50.**

Straightneck Squash

A golden bush Squash, selected from Giant Summer Crookneck, but with a straight neck, which is an advantage to the trucker, who packs in crates or barrels. Size and quality same as Crookneck. **Oz. 25 cts., ¼lb. 75 cts., lb. $2.**

Cocozelle Squash

Italian Vegetable Marrow; New York Market

In this type the fruits are only 1½ to 2 inches in diameter. They do not become "clubbed" but remain an even, regular shape until well past the gathering period. **Oz. 45 cts., ¼lb. $1.30, lb. $3.50.**

Green Lyon Swiss Chard

A vigorous-growing stocky type. The leaves are smooth, deep glossy green, and the stalks are solid, thick, and creamy white. **Oz. 15 cts., ¼lb. 40 cts., lb. $1, 10 lbs. $9.50.**

S. & W. Co.'s Emerald Standing Spinach

A very large and vigorous type of compact, flat, spreading growth. The leaves are large, thick, slightly crumpled, very fleshy and carried on long stems. The color is a very dark green. The most important point about this Spinach, however, is that *it stands fully one month longer than any other variety* before bolting to seed. In spite of this, it is quite early to mature, and is a variety to be recommended from every point of view. **Oz. 10 cts., ¼lb. 20 cts., lb. 50 cts., 10 lbs. $4.50, 100 lbs. $40.**

Long-Standing Savoy Spinach

A new strain of outstanding merit. It is about as early as Bloomsdale of the ordinary type, but since it is a bisexual variety, it stands nearly two weeks longer before bolting. The leaves are intensely crumpled or blistered, very uniform, and of a deep glossy green color. **Lb. 40 cts., 10 lbs. $3, 100 lbs. $27.50.**

Marglobe Tomato

A wonderful Tomato introduced by the U. S. Department of Agriculture. Its disease-resistant, shipping, and heavy yielding qualities have made it a favorite with the market-grower. It bears perfect, deep globe-shaped fruits that are smooth, of a beautiful scarlet color, and of splendid eating quality. We offer a superior strain. **½oz. 40 cts., oz. 70 cts., ¼lb. $2, lb. $6.**

Essex Wonder Tomato

This variety has been evolved by an English grower, and combines extreme hardiness with high-quality fruit and heavy yield. It will withstand several degrees of frost without injury and may be set out a few days earlier than ordinary sorts, while late plantings will yield fruit along into October. **Pkt. (about 200 seeds) 50 cts.**

Break o'Day Tomato

A new development of the late Dr. Pritchard of the United States Department of Agriculture. Break o'Day is the result of a cross between Marglobe and Marvana. About 10 days earlier than Marglobe, fruits scarlet, closely resembling Marglobe in shape, color, and size. Plant-growth quite open. **½oz. 60c., oz. $1, ¼lb. $3, lb. $10.**

Purple-Top White Globe Turnip

A REFINED STRAIN

This variety may be grown to quite a large size, without developing signs of coarseness. It is of spherical shape, the skin white with the upper one-third colored reddish purple. The flesh is pure white, firm, fine-grained, and of superior flavor. It is one of the best sorts to store for winter, and in addition to its fine table qualities, it is excellent and economical for stock-feeding. **Oz. 15c., ¼lb. 40 cts., lb. $1, 10 lbs. $9.50.**

Zucchini

A summer Italian Squash of the Cocozelle order. Quite a favorite on the Pacific Coast. We have the true strain. **Oz. 45 cts., ¼lb. $1.30, lb. $3.50.**

DETROIT DARK RED BEET

BEETS

BETTERAVE Salat-Rübe *Barbabietola*

Allow 1 ounce for 100 feet of drill; 6 pounds per acre

ROUND VARIETIES

DETROIT DARK RED. The round dark red globe roots are uniformly smooth. The flesh of the very young Beets is almost black-red, turning to dark crimson with dark purple zones as the Beets grow larger. When cooked, the Beets are of an appetizing dark red and very sweet. Bunches splendidly and keeps well when stored for winter. **Oz. 15 cts., ¼lb. 40 cts., lb. $1, 10 lbs. $9, 100 lbs. $80.**

DETROIT DARK RED, EXHIBITION STRAIN. This is specially reselected for depth of color, uniformity of shape, and general refinement. It is developed particularly to meet the requirements of the exhibitor and market-gardener. **Oz. 20 cts., ¼lb. 50 cts., lb. $1.35, 10 lbs. $12.50.**

EARLY WONDER. A variety which has gained wide popularity among market-gardeners. It may be sown early, and it matures very rapidly. It is so uniform in growth that the crop can be lifted practically at one time, yielding the land early and quickly for the second crop. The root is nearly globular in shape, slightly flattened. The leaves are of medium size, and the color of the flesh is deep blood-red. **Oz. 20 cts., ¼lb. 50 cts., lb. $1.35, 10 lbs. $12.50, 100 lbs. $115.**

CROSBY'S ORIGINAL EGYPTIAN. Will produce Beets ready for pulling within two or three days after Eclipse. The smooth, dark red roots are topped with light green foliage, which is prominently speckled with dark red. The flesh is carmine, handsomely marked with white zones, very tender and of uniformly sweet quality. **Oz. 15 cts., ¼lb. 40 cts., lb. $1, 10 lbs. $9.**

OTHER GOOD VARIETIES

S. & W. CO.'S WINTER KEEPER. This new Beet is almost globe-shaped, tapering somewhat toward the roots. The flesh is dark red, sweet, and tender at all stages of growth, regardless of size. The tops are green—all the color remains in the Beet. Store it in a cellar or pit until spring, and it will cook more tender and sweet than ordinary varieties will when taken from the garden. **Oz. 35 cts., ¼lb. $1, lb. $3, 10 lbs. $27.50.**

LONG DARK BLOOD. (Out of ground.) A late variety, the root of which is over a foot long. Five inches or more of this grows out of the ground, and the harvesting of the Beet is therefore not attended with much difficulty. The flesh is deep red in color, sweet, and of high quality; it keeps in fine condition through the winter, and its size and shape obviously make it the most economical sort where space is limited. **Oz. 15 cts., ¼lb. 40 cts., lb. $1, 10 lbs. $9, 100 lbs. $80.**

CORN

MAIS Maïs *Mais*

Allow 1 pound for 200 feet of drill or for 250 hills; 15 pounds per acre

EARLY VARIETIES

GOLDEN BANTAM. Perhaps the sweetest Corn grown; *the* standard for quality by which others are judged. Plant attains a height of only 3 to 4 feet, usually bearing two or more ears to the stalk. The ears are compactly filled with kernels which when ready for the table are cream-yellow. Golden Bantam is one of the hardiest varieties of Corn grown, therefore it can be planted with safety earlier than other varieties. **2 lbs. 60 cts., 5 lbs. $1.40, 15 lbs. $3.75, 45 lbs. (bus.) $10, 100 lbs. $19.**

HOWLING MOB. Is ready for use only 3 to 5 days later than the extra-early Cory when both are planted at the same time, but the ears are much larger in size, while the grains are much whiter and sweeter. As an early variety of large size, we cannot too highly praise Howling Mob. **2 lbs. 60 cts., 5 lbs. $1.35, 15 lbs. $3.50, 45 lbs. (bus.) $9.50, 100 lbs. $19.50.**

NEW WONDER BANTAM. A successful cross between Early Wonder and Golden Bantam, possessing all the good qualities of Golden Bantam—its earliness, flavor, and color—but being more vigorous, more productive, and yielding larger ears. Wonder Bantam grows from 5 to 6 feet in height, bearing ears, high up on the stalk, which measure 8 to 10 inches in length. The ears are filled with 8 rows of rich, golden, sugar-sweet kernels. Wonder Bantam appeals alike to the critical market-grower, the home-gardener, and the canner. **2 lbs. 80 cts., 5 lbs. $1.75, 15 lbs. $5, 45 lbs. (bus.) $12, 100 lbs. $25.**

ACTUAL SIZE

Golden Wedding Corn

For sweetness and general refinement of flavor, we consider it superior to Golden Bantam. This variety is being served in season in many leading New York hotels. Trifle larger than Golden Bantam, having twelve rows of delicious golden kernels. A fine early variety that will bring a good price on the market. **2 lbs. 90 cts., 5 lbs. $2, 15 lbs. $5.25, 45 lbs. (bus.) $15, 100 lbs. $30.**

ENDIVE

CHICOREE Endivien *Indivia*

Allow 1 ounce for 150 feet of drill; 4 pounds per acre

BROAD-LEAVED BATAVIAN (Escarolle). The leaves are broad and thick, more or less twisted and waved, with round ends and are of a bright deep green with a nearly white midrib. The inner leaves form a fair head which blanches a creamy white. In its natural state Escarolle forms an excellent salad with an appetizing piquancy. It may be gathered fresh from the ground well into winter, thus furnishing salad at a season when it is most welcome. Frequently served as spinach, when its flavor and health-giving properties render it of high value. **Oz. 20 cts., ¼lb. 50 cts., lb. $1.35, 10 lbs. $13.**

In spite of their large size, the fruits are produced continuously and freely; each strong, spreading, bushy plant may be expected to yield from six to ten splendid "eggs." LETTUCE

LAITUE Salat *Lattuga*

Allow 1 ounce for 150 feet of drill; 3 pounds per acre

BIG BOSTON. (White seed.) A splendid head Lettuce, perhaps the most generally and favorably known of the varieties mentioned here. Forced in frames to great extent in the spring and is also planted in August for late crop. Does not do well for midsummer use, but as a fall or early spring Lettuce is one of the best. Large heads; center crisp and of fine flavor. **Oz. 20 cts., ¼lb. 55 cts., lb. $1.40, 10 lbs. $13.**

BLACK-SEEDED BIG BOSTON. By far the most heat-resisting sort of this type. The plants are of a uniformly darker shade of green, grow more compactly, and stand several days longer than other strains of Big Boston, before running to seed. **Oz. 25 cts., ¼lb. 65 cts., lb. $1.75, 10 lbs. $17.**

Thousands of rows of vegetables and flowers are grown to maturity on the S. & W. Co.'s Trial-Grounds, and every variety sold by the Company is represented. Our view shows a portion of the Lettuce Trials

UNRIVALED SUMMER, GREEN-LEAVED BIG BOSTON. (White seed.) Forms uniformly large heads similar to Big Boston but lighter in color. Ready about a week earlier than Big Boston when sown at same time. May be sown throughout the season. **Oz. 25 cts., ¼lb. 65 cts., lb. $1.75, 10 lbs. $17.**

NEW YORK or WONDERFUL. (White seed.) Possibly the largest Lettuce in cultivation. It is so distinct that, with its crisply curled leaves, very dark color, and remarkable size, a row of New York frequently puzzles even the experienced grower if unacquainted with this variety. It is being shipped into many markets under the name "Iceberg." New York is a sure-heading variety, suitable both for spring and late summer planting; the big, compact, white heads are of the best possible quality. **Oz. 35c., ¼lb. 95c., lb. $2.75, 10 lbs. $25.**

SALAMANDER PERFECTED. (Black seed.) For summer use there are few Lettuces better or more favorably known. The critical market-gardener will find few Lettuces to equal it for summer use, as it remains longer in head before running to seed than most sorts. The heads are good-sized, compact, tender, creamy white inside, outer leaves light green and of most excellent flavor. **Oz. 20 cts., ¼lb. 55 cts., lb. $1.50, 10 lbs. $14.**

MELON Melone *Popone*

Allow 1 ounce for 80 hills; 3 pounds per acre

They are quite thick meated, with very thin rinds; skin light green, regularly ribbed and heavily netted, turning to a golden yellow as the melon ripens. Flesh light green in color, firm but melting, and of uniformly fine flavor. **Oz. 20 cts., ¼lb. 45 cts., lb. $1.25, 10 lbs. $12.**

"10/25" SALMON TINT. The Rocky Ford Muskmelon has been improved under the direction of Professor Blinn of the Colorado Experiment Station, and "10,25" is the best yet. The fruit is heavily and evenly netted, very uniform in size, rust-resisting and early; the flesh is a rich gold in the center, shading out to emerald-green near the rind. MUSHROOM SPAWN

The propagation of Mushroom Spawn under absolutely *sterile* conditions, in one-quart milk-bottles, guarantees it to be 100 per cent pure, full run, no waste material at all, every particle can be used, no insect eggs, no flies, no weed seeds, no moulds of any kind or infection that the *Brick Spawn* is subject to. It is almost certain to produce a large crop, when the beds are properly prepared, and the cost is no greater than the old Brick Spawn per square feet of surface planted. Transportation is much less because the Spawn is lighter in weight.

This is furnished in three varieties, Pure White, Cream, and Light Brown, at the following prices. One quart is enough for 30 to 40 square feet.

1-quart size.....$1 10 **12-quart**.....$11 00

This Spawn is dried thoroughly and shipped in cartons. It will keep in perfectly healthy condition for twelve months.

American Pure-Culture Spawn

New Celery = Bokay

A new variety that we are offering to the grower desirous of securing the finest green Celery on the market today

TESTIMONIAL

I wish to make a report on the seed of the Bokay Celery Seed you sent me. The seed was sowed May 10, when the ground was very wet; the seed germinated well and the plants grew fast; they were transplanted July 3. I wish to state here that the ground had Celery on it last year and blighted so badly that the crop was ruined. No manure was used, or has been on this land for five or six years. I used 1,500 pounds per acre of a 5–8–7 fertilizer. The Celery made a very rapid growth. On August 18 I put paper on the sides of the rows, used 18-inch paper and this was not wide enough, as at this time the Celery was over 24 inches high. I left part of the Celery with no paper on until three weeks ago, when I put paper on that and today, October 23, I cut Celery 36 inches high after it was trimmed for market. I wish you could see it—it is a sight.

The quality is the best I ever had; the stalks are nearly solid and round, not flat like most Celery; no blight or disease of any kind. It can't be beat.

I want some more of the seed for next year.

BOKAY CELERY has been developed from our Earligreen variety, which has proved so popular for the home gardener. The ribs are about same length as Golden Plume (which variety we also introduced) and are more fleshy and rounder than the Easy-Blanching. It has a good golden heart and the bouquet effect of the green ribs with the beautiful heart induced us to name this new variety BOKAY.

BOKAY CELERY is hardy, withstanding frost and drought better than other varieties, and you will also find it a particularly desirable variety to sell to the trade wanting a good green Celery without bleaching. Has good height, which is so desirable for those who ship in crates.

ONION

OIGNON Zwiebel *Cipolla*

Allow 1 ounce for 100 feet of drill; 6 pounds per acre

S. & W. CO.'S SOUTHPORT WHITE GLOBE. Yields abundantly, producing handsome and uniformly globe-shaped bulbs. The flesh is firm, fine-grained, and of mild flavor. To produce the beautifully white Onions, so much sought in every market, one must, first of all, have good seed. Second, grow them well on rich land. Third, exercise great care in harvesting and curing the crop. In Southport, they "cord" up the Onions in long rows, the bulbs on the inside, and cover with boards so that the bulbs in the open air are well protected from rain or dew, which would be sure to discolor them. We have, by years of careful selection and breeding, developed a strain which has no equal in uniformity and beauty of shape and color. ½oz. 25 cts., oz. 40 cts., ¼lb. $1.15, lb. $3.25, 10 lbs. $31.50.

S. & W. CO.'S SOUTHPORT RED GLOBE. Similar to White Globe, except the skin is a purplish crimson. The market-gardener who has grown our Southport Globe strains will doubtless realize that nowhere can any better or more uniform strain, true to type, be produced. ½oz. 20 cts., oz. 30 cts., ¼lb. 90 cts., lb. $2.50, 10 lbs. $24.

S. & W. CO.'S SOUTHPORT YELLOW GLOBE. The enormous quantities of this Onion annually sent to market prove its popularity, and it is more largely grown than any other sort. We can confidently claim superiority for our strain of seed; it produces large and uniformly spherical bulbs with very small necks. The largest diameter is below the center of the bulb. The color is a rich orange-yellow. Keeps splendidly. ½oz. 20 cts., oz. 30 cts., ¼lb. 90 cts., lb. $2.50, 10 lbs. $24.

WHITE PORTUGAL or SILVERSKIN. A leading white, flat Onion. The bulbs ripen early, are flat but symmetrical. It is not only early, but a good keeper. ½oz. 20 cts., oz. 35 cts., ¼lb. $1, lb. $3, 10 lbs. $29.

EARLY SMOOTH-SEEDED SORTS

FIRST OF ALL or PEDIGREE EXTRA-EARLY. The characteristics of this variety are extreme hardiness and earliness. The first planting of Peas should be with First of All. It is a smooth-seeded variety, a splendid cropper, Peas very tender, of good flavor and carried in long, tightly filled pods. Height 2½ feet. **5 lbs. $1.15, 15 lbs. $3, 60 lbs. (bus.) $11, 10 bus. $100.**

MARKET SURPRISE. On vines 3 feet tall, Market Surprise bears 3½-inch pods in great quantities, within 60 days from date of sowing. It is thus but four days later than the best Extra-Early, while the pods contain on an average two more Peas, and the Peas are larger. They are of truly remarkable sweetness. Home-gardeners, as well as truckers, will find this new sort a big surprise in every way. **5 lbs. $1.35, 15 lbs. $3.65, 60 lbs. (bus.) $13, 10 bus. $120.**

EARLIEST WRINKLED SORTS

WORLD'S RECORD. Among early main-crop Peas of medium height, Gradus, or Prosperity, takes first place; happily named, indeed, on account of its high yield and superb flavor. In World's Record these points are more than maintained; the yield is as high and the quality, if anything, is enhanced. The great point in favor of the new sort is its *earliness*. **5 lbs. $1.25, 15 lbs. $3.25, 56 lbs. (bus.) $12, 10 bus. $110.**

GRADUS or PROSPERITY. The vine has heavy stems, with large, light green leaves and grows about 3 feet high. It produces uniformly large pods, measuring from 4 to 4½ inches in length, nearly round and well filled with very large, handsome Peas of the finest flavor; very early, ready for picking after First of All is through, and leaves little to be desired. Height 3 feet. **5 lbs. $1.25, 15 lbs. $3.25, 56 lbs. (bus.) $12, 10 bus. $110.**

LAXTONIAN. A very fine dwarf early Pea. Unusually large pods, borne on long-growing, sturdy vines. The large pods are filled with large, luscious Peas. BOSTON UNRIVALED or TELEPHONE. This variety is much like Alderman, with vines fully as tall, pods slightly smaller, lighter green, and bears right up to the season of the very late sorts. Allow 1 ounce for 100 feet of drill; 15 pounds per acre

S. & W. CO.'S EMERALD STANDING. A very large and vigorous type of compact, flat, spreading growth. The leaves are large, thick, slightly crumpled, very fleshy, and carried on long stems. The color is a very dark green. The most important point about this Spinach, however, is that *it stands fully one month longer than any other variety* before bolting to seed. In spite of this, it is quite early to mature. **Oz. 10 cts., ¼lb. 20 cts., lb. 50 cts., 10 lbs. $4.50, 100 lbs. $40.**

S. & W. CO.'S SAVOY-LEAVED or BLOOMSDALE. A variety highly valued alike by market-growers and home-gardeners. The leaves are wrinkled and crumpled. The variety is profitable on account of the heavy yield of produce, and it is particularly hardy. **Lb. 35 cts., 10 lbs. $2.75, 100 lbs. $25.**

S. & W. CO.'S NEW YORK MARKET. This Spinach grows rapidly and produces unusually large, thick, crumpled leaves of beautiful green. EARLY SORTS

CHALK'S EARLY JEWEL. About a week later than Earliana. It is of uniformly large size; of brightest red, deep-fruited, and solid. EARLIANA. **The Earliest Red Tomato.** The plants are of compact growth, with short, close-jointed branches, setting the fruit very freely in the center. JOHN BAER. An early, bright red Tomato of wonderful quality. But little later than Earliana, it far surpasses that variety in size and quality; it is, further, one of the heaviest-yielding sorts we know. Stone is superior to any other main-crop Tomato for its heavy yield and high quality. We offer a specially selected stock. **Oz. 45 cts., ¼lb. $1.30, lb. $3.50.**

GLOBE. It is of a beautiful globe shape, with quite a percentage of elongated (stem to blossom) fruits, which permits of a greater number of slices being taken than with flat-fruited sorts. Among the very first to ripen, although of large size; very smooth, firm-fleshed, few seeds, ripens evenly; color a beautiful glossy rose, tinged purple. Flavor very delicate and agreeable; splendid slicing variety. The fruit is borne on short-jointed, branching plants in great abundance—literally loaded with fruit. A good general cropper, and one of the very best for greenhouse growing, or first-early crop. **Oz. 55 cts., ¼lb. $1.65, lb. $4.50.**

Long-spurred Aquilegia

Aster

New Giant Peony-flowered

This magnificent strain, which we introduced last season, has proved to be one of the finest Asters ever introduced. It has been grown by all the leading private gardeners and florists throughout the country, and has given them satisfaction in every way. It is exceptionally good for cutting; the stems are exceedingly upright, non-lateral branching. Flowers are splendid keepers, good shippers, and often exceed 6 inches in diameter. We offer this magnificent strain in the following six colors:

Apple Blossom — **Peach Blossom**
Azure-Blue — **White**
Rose — **Purple**

Any of above New Asters, Trade Pkt. 25 cts., ⅛oz. 60 cts., ¼oz. $1, oz. $3.50

Two Fine New Everblooming Begonias

Christmas Cheer

A magnificent novelty in the Everblooming or Semperflorens type of bedding Begonia. This variety bears flowers of enormous size, attaining a diameter of 2 inches, the plants being covered with a mass of blooms throughout the entire season. The color is a beautiful shade of bright cherry-red. This variety is particularly adapted for bedding purposes, being quite hardy and will thrive in either full sun or partial shade.

Christmas Pink

Same as above, except in color, which is a beautiful shade of bright pink.

Either of above, Trade Pkt. (about 1,000 seeds), $1; ⅛oz. (about 5,000 seeds), $2

Three New Florists' Calendulas

The Ball

A special florists' strain of Orange Calendula. The very large, orange-yellow flowers have a lighter center, are borne on long stems, and come uniformly double. This is an exceptionally fine Calendula for greenhouse growing. **¼oz. 30 cts., oz. $1, ¼lb. $3.50.**

Campfire (Sensation)

This new type has been thoroughly tested under glass and has been accepted as the best forcing Calendula for that use. The blooms are flat and are undoubtedly larger than those of any other type previously introduced. The color is brilliant orange, with a scarlet sheen and a full yellow center. **Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50.**

Radio

A Distinct Novelty

In Radio we offer a variety entirely new in Calendula. There have been many new Calendulas introduced during the past few years, but there has not been a distinct break in the formation of the flower. The flowers of Radio are globular, with beautifully quilled petals, and the color is a warm, deep yellow. **¼oz. 30 cts., oz. $1.**

Cheiranthus Allioni

New Hybrid Delphinium

Specialties in Flower Seeds

New Florists' Carnation, Rasse Teicher

This is the best and most improved Florists' Carnation on the market today. It is much superior in size and form of bloom, and also in length of stem.

Both types require the same amount of space and treatment, but whereas the old type will produce a large proportion of single blooms, the doubles being of moderate size, this variety will produce enormous flowers equal to any grown under glass.

The culture is perfectly simple. If sown during August and September and treated like pansies, they will survive the winter and bloom profusely the following summer. They can also be started under glass in January and February and transplanted outside as soon as weather permits.

White **Scarlet**
Salmon **Dark Red** (crimson)
Rose **Purple**

Trade Pkt. (about 35 seeds), 25 cts., 100 seeds $1, 1,000 seeds $7.50

Cheiranthus Allioni

Siberian Wallflower

In presenting this beautiful little early-flowering perennial Wallflower with gorgeous orange flowers, we suggest it as a splendid little plant for the rock-garden or as a dwarf border plant. Will bloom throughout the summer if seed-pods are removed. May be sown in the open ground in September where required to flower the following spring, or will bloom first season from seed, if sown in a hotbed in March and transplanted outdoors in May. **¼oz. 25 cts., oz. 75 cts.**

Coreopsis, Perennial grandiflora flore-pleno

A reselected strain producing semi-double flowers (and sometimes double) which are a great improvement over the old type, being larger. They possess, however, the rich yellow color and graceful appearance which make Coreopsis so valuable for bedding or cut-flower purposes. **¼oz. 30 cts., oz. $1.**

Cosmos

Extra-Early Double-Crested Beauty

The Extra-Early Double strain of Cosmos has been very much improved in this crested type. The flowers are unusually large, and they come into bloom fully as early as the Early Single sorts.

Pink Beauty **Crimson Beauty**
White Beauty **Mixed Beauty**

Each, Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50

Super Delphinium

Stumpp & Walter Co.'s Super Gold Medal Hybrids

Specialists in America and Europe vie with one another in the improvement of this wonderful and without a doubt, "the most popular hardy perennial." The varieties of yesterday are mere caricatures compared to the strain we are offering. The plants are of strong and vigorous habit and the spikes frequently attain the height of 6 feet, with flowers of very large size and colors of the finest range—lilac, pale blue, light blue, dark blue, and petunia-violet. The individual florets are quite distinct, and diversified in form.

Few of the best named varieties of this Hybrid come true from seed, therefore we suggest growing this strain and enjoying the pleasure of selecting your own favorites, which can be increased the next year from root divisions.

Wave Crest Blue Shades. A very delicate and charming strain of pale and light blues.

Delft Blue Shades. True blues of special beauty.

Salon Blue Shades. This strain abounds in rich, dark velvety blue tints.

Royal Art Tints. A very desirable mixture of subtle shades.

Any of above shades, Trade Pkt. 50 cts., ¼oz. $1, oz. $3.50.

Delphinium, New Hollyhock Strain

A fine mixture of all light shades, pale clear blue predominating. Large flowers, truly double, are well placed on long, pyramidal spikes. Their sturdy appearance reminds one of the Hollyhock, hence the name. **Trade Pkt. 50 cts., ⅛oz. $1.50, ¼oz. $2.50, oz. $7.50.**

Three New Gaillardias

THE DAZZLER. The largest and most attractive Giant Red Gaillardia. Flowers are very large, rich dark red, with a bright orange tip on the end of each floret. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.25.**

¼oz. 25 cts., oz. 75 cts.

Giant Shirley Foxglove (Digitalis)

A new and magnificent strain of Foxgloves raised by the late Rev. W. Wilkes, who originated the Shirley Poppy. It is considered by plantsmen as being the greatest improvement ever made in Foxgloves. The very vigorous plants attain the height of 5 to 7 feet with spikes of bloom ranging in color from the purest white to dark rose, handsomely spotted and blotched with crimson, maroon, and chocolate. This is certain to supersede all other strains of Foxgloves. Seed sown this spring should produce plants which, if properly grown on outdoors this summer and placed in their permanent positions before autumn, will make a glorious show next season. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50.**

GEUMS

Three Fine New and Rare Double Varieties

The following three new large-flowering Geums are among the best hardy perennials of recent introduction.

Double Orange Queen. We are pleased to offer what has hitherto baffled the hybridists and selecters to produce, namely, a Geum of a shade, intermediate, so to speak, between that of Mrs. Bradshaw and Lady Stratheden. The plants are similar in habit to both of these highly popular sorts, and as they are quite as large and free-blooming, we have no doubt that Orange Queen, in coming to complete a splendid trio, will soon acquire an equal share of public favor. Height, 1½ feet. **Pkt. 20 cts., 6 pkts. $1.**

Double Mrs. Bradshaw. The very large, full flowers are an attractive shade of orange-scarlet. They come quite true from seed and bloom the first year, if sown early. Height, 1½ feet. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50.**

Double Lady Stratheden. Fine rich golden yellow flowers. A splendid companion to Orange Queen and Mrs. Bradshaw. Height, 1½ feet. **Trade Pkt. 25 cts., ¼oz. $1, oz. $3.50.**

Gerbera Jamesonii Hybrids

Transvaal Daisy

Beautiful, Daisy-like plants, slender and graceful. A well-known greenhouse subject and largely used for conservatory decoration, but capable also of being grown in the open ground if the protection of a coldframe is given the plants over the winter months. This is a splendid mixture, embracing many shades of red, cerise, salmon, orange, yellow, and white. **100 seeds $1, 1,000 seeds $5.**

New Tall Godetias

We are pleased to offer five new varieties of this charming annual of easy culture. The plants are of distinct and graceful habit and are excellent for cutting. The sprays should be cut as the flowers are just coming to perfection, as they will fully develop after being placed in water. Excellent border plant, frequently attaining the height of 2 to 3 feet.

Tall Double Pink **Tall Double Crimson**
Tall Double Rose **Tall Double Mauve**
Tall Double Carmine

Any of the above varieties, ¼oz. 25 cts., oz. 75 cts.

New Dwarf Godetias

Scarlet, Edged White. An attractive variety of Dwarf Single Godetia, very even in its growth and producing very large flowers. The color is striking, being scarlet with an edging of white. **¼oz. 30 cts., oz. $1.**

Dwarf Double Azalea-flowered, Carminea. Highly recommended for pot culture. Pink, strikingly marked with darker shades. So free-flowering that when it is in full flower it is nothing but bloom. May be called an annual Azalea. **¼oz. 30 cts., oz. $1.**

Hollyhock Double Exquisite

A new strain of Hollyhock which will prove a delight to all those who enjoy this old-fashioned flower. Blossoms are beautifully fringed and frilled or deeply dentate, and the colors are charmingly fresh and bright. The flowers are large and beautifully placed on tall, stately spikes. **Trade Pkt. 25 cts., ⅛oz. $1, ¼oz. $1.50, oz. $5.**

New Annual Larkspur

For the past several years our growers have been trying to produce an Annual Larkspur with the habit of the Delphinium. Last year we offered three of these types and this year we are able to offer two new varieties, namely Gloria and Peach Blossom. All these varieties have the characteristics of the Delphinium; that is, with the branching base and the long flower-stalk, and we feel sure that they will in time supersede the old stock-flowered type.

EXQUISITE PINK IMPROVED. The delightful shade of pink meets exactly the florists' requirements. **Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50.**

LA FRANCE. The flowers are a pleasing shade of salmon-pink, a shade closely resembling the popular antirrhinum, Jennie Schneider. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50.**

WHITE SPIRE. A new, dazzling, pure white, double Larkspur. **Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50.**

BLUE SPIRE. This variety is an intense deep Oxford-blue—the most popular color with the florist. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50.**

LILAC SPIRE. A beautiful tone of lilac, similar to Lilac Perfection in the old stock-flowered type. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50.**

CARMINE KING. This may be described as a deep carmine-rose, a color always popular with the florist. **Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50.**

PEACH BLOSSOM. A real clear light pink with no trace of salmon. **Trade Pkt. 25 cts., ¼oz. $1, oz. $3.50.**

Two New Marigolds

AFRICAN ORANGE, ALLDOUBLE. Any strain of African Marigold that will come 70 per cent double is considered good—85 is excellent. We are pleased to be able to offer to the florist a strain of Orange Marigold which has come 85 per cent double for the last three years, and we offer this under the name of Alldouble.

AFRICAN LEMON, ALLDOUBLE. Similar to the above, except in color, which is a delightful shade of lemon-yellow.

Each of the above, Trade Pkt. 25c., ⅛oz. 60c., ¼oz. $1, oz. $3.50

New Double Sweet-scented Nasturtium (Dwarf), Golden Gleam

One of the outstanding novelties of the season. The plant forms a large, vigorous bush which throws out short runners averaging 18 inches long. The flowers commence to come as soon as the plant nears complete development, and at the time it is in full bloom the entire plant, including the runners, is a blaze of color. The large golden yellow flowers average 2½ to 3 inches across. They are borne on erect, stiff stems, 6 inches long, consequently stand well above the foliage, an arrangement which adds immeasurably to the showy appearance of the plants. This distinct novelty will be welcomed by the florist as a delightful addition to the Nasturtium family as a cut-flower on account of its glorious color and delightful fragrance. **Pkt. 25 cts., oz. 75 cts., ¼lb. $2.50.**

Petunia, New Giant-Flowering Dwarf

Produces the largest flowers of any dwarf Petunia on the market today. They are of handsome shape with open throats, heavily marked and delicately veined. The plant is compact, strong, and vigorous. **Mixed colors. Trade Pkt. 50 cts., ¼oz. $2, ½oz. $3.50.**

Petunia (*fimbriata cærulea*)

Steel-blue Fringed

This is a very attractive and unique fringed Petunia and can be briefly described as a steel-blue, heavily veined, with a medium-large throat of deeper blue. The outer part of the throat has the appearance of being overlaid with veins of darker blue. It is very deeply fringed and the most attractive light blue Petunia on the market. Fine for pots. **Trade Pkt. 50 cts., ¼oz. $2.50.**

Chinese Lantern Plant

This beautiful little plant, which is grown chiefly for the orange-scarlet lantern-like fruits that are gathered in the fall and serve as splendid decoration in the home at Thanksgiving and Christmas time, is of comparatively easy culture. While a perennial, it can be had in flower the first year if seed is sown early. **Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50.**

New Double Shirley Poppies

Mixed Colors, Hardy Annual

This is a new, semi-double type of the beautiful Shirley or Ghost Poppy. The color-range is very wide, including carmine, rose, salmon, and white shades, while the flowers are very beautiful and graceful; they are carried well above the plant on strong stems. **¼oz. 30 cts., oz. $1.**

New Primula Obconica

Glory of Farmingdale (Aalsmeer)

This new development of *Primula obconica* is of special interest to the commercial florist. The flowers are a pleasing shade of bright rose, individually large and well set on strong, sturdy plants. The grower will have few discarded plants with this strain, and we recommend it with every confidence as the best of its type. **Trade Pkt. (about 500 seeds) $1.50, ⅛oz. (about 3,000 seeds) $7.50.**

Giant Polyanthus

The visitor to any of the famous gardens of England in Maytime is greatly impressed with the manner in which this beautiful Primrose is used and the gorgeous display the better varieties present. Many of the larger gardens use them to intersperse between May-flowering Tulips in their bulb-gardens, but they are best seen to advantage in borders or in beds. The strain we are offering is of strong sturdy habit, and bears immense trusses of large flowers on strong stems 10 inches in length. The colors vary from pure white to rich wallflower-red. Seed is usually sown in early summer, in a frame, and the plants transplanted to the garden in the autumn. They require slight protection over winter. **Trade Pkt. 25 cts., 1/16oz. 50 cts.**

Pyrethrum, S. & W. Co.'s New Double Hybrids

This beautiful perennial, when grown from a selected strain, is one of the finest for cutting. The seed we are offering is grown by a specialist who, after painstaking effort, has produced a wonderful strain. The flowers are large, very double, and the colors are distinct shades of pink, salmon, scarlet, and pure white. **Trade Pkt. 25 cts., ⅛oz. $1, ¼oz. $1.50, oz. $5.**

THREE FINE SALVIAS

All varieties are American-grown except where noted.

HARBINGER. This is a true, dwarf, large-flowering Salvia which commences blooming in July from early-sown seed and continues until hard frost. It makes beautiful symmetrical plants about 15 inches high, and is densely clothed with long sprays of large, brilliant scarlet flowers. **Trade Pkt. 25 cts., ⅛oz. $1.50, ¼oz. $2.50.**

AMERICA or GLOBE OF FIRE. Our Selected American-grown Seed. A new variety of this popular flower. The bushy plants do not grow over 15 inches high, with the large spikes of brilliant scarlet flowers thrown well above the plant, making a total height of about 2 feet. If desired for borders or beds, this is indeed an acquisition on account of its uniformity of height. **Trade Pkt. 50 cts., ⅛oz. $1, ¼oz. $1.50, oz. $5.**

America or Globe of Fire, Imported Seed. Grown by a very reliable grower. **Trade Pkt. 25 cts., ¼oz. 60 cts., oz. $2, ¼lb. $7, lb. $25.**

OSTRICH-PLUME. The Ostrich-Plume Salvia is the most beautiful of all Salvias of recent introduction. The habit of the bush resembles the Splendens type but, unlike Splendens, produces a plume. The bush is well covered with these plumes of intense, dazzling scarlet. **Trade Pkt. 25 cts., ⅛oz. $1, ¼oz. $1.75.**

New Annual Scabiosa Giant Loveliness

Loveliness is a glorious new color in annual Scabiosas. The blossoms range through varying tones of delicate salmon-rose. This is undoubtedly the most beautiful Scabiosa ever introduced and is unsurpassed as a cut-flower. It has long, stiff stems and a delightful fragrance, but its crowning beauty is its glorious salmon-rose color. **Trade Pkt. 25 cts., ¼oz. 60 cts., oz. $2.**

Two New Perennial Scabiosas

GIANT HYBRIDS OF SCABIOSA CAUCASICA. (Isaac House Strain.) Characteristics of this new type are larger flowers with heavier petals and on longer stems. In this mixture it is natural for delicate lilac and mauve to predominate, but pure white and several shades of dark blue also occur. These hybrids are splendid for the hardy border, and we also recommend them as a florists' cut-flower. **Trade Pkt. 50 cts., ⅛oz. $1, ¼oz. $1.50, oz. $5.**

COLUMBARIA. A splendid novelty from South Africa. It is reminiscent of *Scabiosa caucasica*, but is entirely distinct. It is quite dwarf in habit, and produces flowers 2 to 2½ inches in diameter, on long, strong stems. Excellent for cut bloom. We offer it in **Pink** and **Lavender.** Each shade, **Trade Pkt. 50 cts., ⅛oz. $2.**

NEW ZINNIAS

We offer on page 46 all the types of Zinnias listed by us, but have illustrated in our Novelty Section several new types which our California growers have developed in recent years.

Giant Double Dahlia-flowered

The plants are of the same vigorous habit as our Giant Double-flowering variety. They attain the height of 3 feet, producing mammoth flowers averaging 6 inches across by 3 to 4 inches in depth, similar in shape to the Decorative Dahlia, a fitting companion to our strain of Giant Double-flowering Zinnias.

TWO FINE NEW VARIETIES

Golden Dawn

The flowers are a golden yellow comparable to that color in the Double Giants, or a shade between Golden State and Canary Bird in the Dahlia-flowered type. They are of enormous size and of the most perfect type.

Youth

The flowers are a beautiful shade of soft rose, well-formed, grown on the usual robust, Dahlia-flowered plant. It is a very vigorous, free-flowering variety. Youth is three or four shades lighter than our popular Exquisite.

Any of the above, Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50

BEST SEVEN POPULAR VARIETIES

Pumila Picotee Delight

This Zinnia is the result of crossing Dwarf Double Salmon-Rose with the tall Picotee, and the plants are of compact growth and very floriferous. The petals are ruffled and curled, giving a light and dainty effect, and in addition, each petal is beautifully picoteed, making a most attractive flower.

It includes salmon shades, cream, buff, biscuit, golden yellow, lavender, in fact, a collection of colors most suitable for florists' use. **Trade Pkt. 25 cts., ⅛oz. 60 cts., ¼oz. $1, oz. $3.50.**

Queen of the Market Aster

Early Royal Aster

Improved Crego Aster

S. & W. CO.'S SUPERB ASTERS

For the purpose of aiding our patrons in making easy selections of the kind of Asters they desire to grow, we are listing the varieties under the headings Early, Midseason, and Late. The early sorts, such as Early Wonder, Queen of the Market, Lavender Gem, and Early Royal, begin blooming in July, followed by the midseason varieties, such as the Kings, Improved Cregos, California Giants, White Perfection and the Astermums. Then come the late-flowering varieties, such as S. & W. Co.'s Late Branching, the Beauty Type, Autumn Glory, Heart of France, and Pink Enchantress which come into bloom from the end of August on through September into October. It is quite easy, therefore, with a little care in the selection of the varieties, to have Asters in bloom from early July to hard frost.

EARLY-BLOOMING ASTERS

Early Wonder. We consider this the earliest Aster in our list, flowering in early July from seeds sown in the open ground at the end of April, or, if sown indoors in March, can be had in bloom before the close of June. The flowers are of good size, quite double, and are borne on good, long, stiff stems, which, added to their extremely early flowering, makes them of great value for cutting.

Carmine-Rose **White** **Light Rose**
Light Blue **Dark Blue** **Mixed**

Any of the above colors, or mixed, Trade Pkt. 25 cts., ¼oz. 60 cts., oz. $2, ¼lb. $7.50

Queen of the Market. This well-known, early-flowering Aster is of a branching habit, growing about 1½ feet high, and comes into bloom directly after Early Wonder.

White **Crimson** **Flesh-Pink**
Rose **Dark Blue** **Light Blue**
Mixed

Any of the above colors, or mixed, ¼oz. 30 cts., oz. $1, ¼lb. $3.50

Early Royal. **(Branching Type.)** This type of Aster is of recent development and is best described as an early-flowering form of our Superb Late Branching Aster, having all the good qualities of the latter, but coming into bloom in early August. It is a splendid type of Aster for beds or borders, and its long-stemmed flowers are ideal for cutting.

White **Rose-Pink** **Shell-Pink**
Lavender **Purple** **Mixed**

Any of the above colors, or mixed, ¼oz. 30 cts., oz. $1, ¼lb. $3.50

MIDSEASON-BLOOMING ASTERS

The Six King Asters. This magnificent class of Asters is distinct from all others in the character of the flowers. The long, narrow petals are folded lengthwise, appearing almost as though quilled. The flowers are of great size and substance, and last longer when cut than any other class.

The plants are large, and the stems exceptionally long and strong. They bloom very profusely and will pay handsomely for cutting.

Lavender King **Violet King** **Rose King**
Pink King **White King** **Crimson King**

The above colors and mixed, ¼oz. 30 cts., oz. $1, ¼lb. $3.50

MIDSEASON-BLOOMING ASTERS, continued

Improved Crego or Ostrich-feathered. **(Improved Comet Type.)** This is considered to be the finest and largest of all the Comet Asters. The flowers are borne on long, stiff stems and are of a fluffy character, frequently measuring 5 inches and over in diameter. They are splendid for cutting purposes on account of their good keeping qualities.

White **Purple** **Lavender** **Crimson**
Azure-Blue **Pink** **Deep Rose** **Mixed**

Any of the above colors, or mixed, Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50

S. & W. Co.'s Midseason Giants. Our grower, after several seasons of hybridizing and selecting, is now able to offer a type characterized by the Beauty's vigorous growth and the Crego or Ostrich-feather type of flowers—a true nonlateral Aster. The flowers are much larger and more substantial than the Improved Crego, measuring 5 to 6 inches in diameter and standing up well when shipped as cut-flowers.

Dark Purple, Light Blue, Light Purple, Peach Blossom, Rich Rose and **White.**

Trade Pkt. 25 cts., ¼oz. 75 cts., oz. $2.50

Astermums. The plants are of upright growth, frequently having twelve to fifteen strong, sturdy stems 1½ to 2 feet long, each carrying enormous flowers of splendid form, the petals completely covering the center so as to give the impression of one of the large Japanese chrysanthemums.

Snow-White **Rose-Pink** **Lavender**

The above colors, ¼oz. 30 cts., oz. $1

Giant California Sunshine Asters

The Most Beautiful Aster in the World

This new strain of supremely beautiful Asters is the result of a direct cross between our now well-known California Giants and the dwarf, much-branched Sunshine type, hence the name. Plants of this new race grow 3 feet high and bear blossoms on long, stiff stems, admirable for cutting. The individual blooms are enormous—4 to 5 and 6 inches in diameter. The grace and beauty of build, with cushiony centers of tubular, bifurcate petals, and the rim of exquisitely poised out-guard petals surrounding the central disk, make for a lacelike perfection and daintiness of form and contour that must appeal to the most esthetic taste. We offer this magnificent strain of Asters in mixed colors of **Enchantress Pink, Apple-blossom, Deep Rose, Blue,** and **Lavender,** all with disk of lovely light yellow.

Late Branching Aster

Beauty Aster

S. & W. CO.'S SUPERB ASTERS

LATE-BLOOMING ASTERS

S. & W. Co.'s Branching

This exceptionally fine Aster is without a rival. It is as well known in Europe as in America, and although we placed it on the market only a few years ago, today every florist has a fine stock of the flowers in his window just before the chrysanthemum comes in; and it is often mistaken for the chrysanthemum, which it so much resembles. The flowers are of extraordinary size—much larger than other varieties—and stand erect on long, graceful stems, well above the foliage; flower-stems 15 to 20 inches long. Grand for cutting.

Beauty

This is a recently developed late-flowering strain, coming into bloom late in September and being at its best through October. The plants grow nearly 3 feet high and bear their very large, densely covered flowers on long, strong stems. A very desirable addition to the Aster family on account of their late-blooming character and excellence for cutting. We offer five distinct colors.

Light Blue	**Carmine-Rose**	**Purple**
Light Pink	**White**	**Mixed**

The above colors, Trade Pkt. 25 cts., ¼oz. 50 cts., oz. $1.50,

Single Comet Asters

This type of Asters has met with considerable demand recently. From a decorative point of view the possibilities are immense. Their large blooms often measure 5 to 6 inches across.

Light Blue	**Dark Blue**	**Mixed**

Any of the above colors, or mixed, ¼oz. 30 cts., oz. $1, ¼lb. $3.50

Dwarf Queen Asters

Flesh-Color	**Crimson**	**Dark Blue**
Brilliant Rose	**Light Blue**	**White**

Any of the above colors, or mixed, Trade Pkt. 25 cts., ¼oz. $1, oz. $3.50

MISCELLANEOUS ASTERS

Heart of France. This recent introduction is the largest flowering of the very dark red sorts. The plants grow about 2 feet high, are nicely branched, and bear their long, rich, deep ruby-red flowers on long, strong stems. Blooms with the late-blooming sorts. **Trade Pkt. 25c., ¼oz. 50c., oz. $1.50.**

Lavender Gem. Truly a gem and easily the finest early lavender. In the full, double flower, the feathery effect of the ostrich-feathered type is enhanced by the fact that it bears long, partly tubular florets that are irregularly cut and slashed, resembling ragged chrysanthemums. **Trade Pkt. 25 cts., ¼oz. 50c.**

Peerless Yellow. A splendid new Aster with flowers sometimes 5 inches across. It has a border of curled, recurved, strap-shaped florets of pure white and the center consists of recurved and incurved disc-florets of deep yellow. Extremely valuable both for cut bloom and for garden decoration. **Trade Pkt. 25 cts., ¼oz. 75 cts.**

Moreton Pink. This beautiful Aster is a pleasing shade of salmon-pink, similar to the Enchantress carnation. It blooms about a week earlier than Autumn Glory. The flowers are full, double, of medium length and very broad. A splendid variety for cutting. **Trade Pkt. 25 cts., ¼oz. 50 cts.**

Ball's White. Finest midseason white Aster in cultivation. The flowers are 4 inches in diameter and exquisite in form, and the plants are taller than those of the late upright Asters. When first open the entire flower is whorled, producing a charming effect; the broad petals are slightly folded lengthwise, making them appear rather narrow. The plants are extremely vigorous, and they carry about twelve large flowers on strong stems free from side branches. **Trade Pkt. 25 cts., ¼oz. 50 cts.**

Hardy Perennial Asters

Michaelmas Daisies

Single, fall-flowering, hardy herbaceous plants which thrive in any good garden soil.

SALVIA

Our strains of Salvias have all been grown especially for us and have been selected from specimen blooms.

All varieties are American grown except where noted

THREE FINE VARIETIES

HARBINGER. This is a true, dwarf, large-flowering Salvia which commences blooming in July from early-sown seed and continues until hard frost. It makes beautiful symmetrical plants about 15 inches high, and is densely clothed with long sprays of large, brilliant scarlet flowers. Trade Pkt. 25 cts., ⅛oz. $1.50, ¼oz. $2.50.

AMERICA or GLOBE OF FIRE. Our Selected American-grown Seed. A new variety of this popular flower. The bushy plants do not grow over 15 inches high, with the large spikes of brilliant scarlet flowers thrown well above the plant, making a total height of about 2 feet. If desired for borders or beds, this is indeed an acquisition on account of its uniformity of height. Trade Pkt. 50 cts., ⅛oz. $1, ¼oz. $1.50, oz. $5.

America or Globe of Fire. Imported Seed. Grown by a very reliable grower. Trade Pkt. 25 cts., ¼oz. 60 cts., oz. $2, ¼lb. $7, lb. $25.

OSTRICH-PLUME. The Ostrich-Plume Salvia is the most beautiful of all Salvias of recent introduction. The habit of the bush resembles the Splendens type but, unlike Splendens, produces a plume. The bush is well covered with these plumes of intense, dazzling scarlet. Trade Pkt. 25 cts., ⅛oz. $1, ¼oz. $1.75, oz. $6.50.

S. & W. Co.'s Zinnias

Our Zinnias will bear comparison with the best; there are, doubtless, many as good, but none better.

CALIFORNIA GIANTS

This is a mutation from the Dahlia-flowered, therefore it carries the same robust habit, throwing vigorous laterals from which the best flowers usually come. When the flowers are half-grown they make a useful florist's cut-flower, and when in full bloom they reach enormous size, but their flatness gives them a more graceful appearance in contrast with the Giants which are described as conical in form. We have seen some flowers 8 to 9 inches in diameter in our improved strains. They are rapidly replacing the old or Double Giants which are quite large but not so graceful.

Enchantress. Color same as Exquisite in Dahlia-flowered type.

LILLIPUT IMPROVED

No type of Zinnia has come into favor so rapidly as our improved strain of Lilliput. For several seasons we have been concentrating on a type with plants of even height for bedding purposes, bearing small, button-like, fully double flowers.

Salmon-Rose, introduced several years ago, attracted the attention of florists for basket-work. Crimson Gem followed. Although classed as bedding type, they will throw long stems when heavily fertilized, thus making them valuable for florists' use. The collection is as follows:

Canary-Yellow
Crimson Gem. Dark crimson.
Golden Gem
Salmon-Rose
Scarlet Gem (Red Riding Hood).
White Gem
Mixed. Includes all varieties.

S. & W. CO.'S SWEET PEAS

EARLY-FLOWERING VARIETIES

We have great pleasure in offering to our patrons a very complete list of Early or Winter-flowering Spencer Sweet Peas. Many of our patrons grew them under glass last fall and produced wonderful results. This, however, is not the only reason Sweet Pea growers have worked to produce the large-flowering strain of Sweet Peas to flower early. This new race of Early-flowering Spencer Sweet Peas is particularly adapted to sections where the Summer-flowering Spencer varieties have not proved satisfactory. In our southern states, Japan, Australia, as well as all tropical or sub-tropical countries, this strain of Early-flowering Spencers, if sown during the early fall months, will produce flowers during the winter and continue until killed by the extreme heat. This is a distinct advantage over the regular Spencer Sweet Peas which, if sown at the same time, will not begin flowering until April.

The number of varieties of Early-flowering Sweet Peas that are now being offered has become so numerous that we have been obliged to make a careful survey of the kinds that are distinct in their color and also those that do best in the various parts of this country. The following list, we feel, covers this need quite well.

FIVE NEW VARIETIES

EARLY PAL. Here is one of the entirely new shades. It has the lively, scintillating, pleasing, rich rose-crimson color which florists and commercial growers have been looking for. It is a wonderful color in artificial light. Early Pal belongs to the new long-stemmed line we began with the introduction of Early Sunray last year. The flowers are of excellent form, large and bold. The vines are vigorous in growth and very free flowering. We predict a long and successful future for Early Pal. **½oz. 60 cts., oz. $1, ¼lb. $3.50.**

EARLY APOLLO (Long-stemmed). In Early Apollo we have a fine companion for Early Sunray (long-stemmed) introduced recently. Early Apollo belongs to our new race of long-stemmed Early Sweet Peas developed for commercial flower-growers and florists. The color is a soft salmon-cerise which might be described by many as a soft salmon-pink self. It is a charming and appealing shade, blending perfectly with most pink and lavender tones of color. Contrasted in a bunch with white or cream the effect is delightful. The flowers are unusually large, nicely waved, splendidly placed, and the stems very long. Truly a great novelty. **½oz. 60 cts., oz. $1, ¼lb. $3.50.**

EARLY SPARKLE. For many years the late varieties, Royal Scot and Grenadier, have been the popular scarlet-cerise shades. In Early Sparkle we have this popular shade in an Early. Its color is bright, clear, vivid scarlet, and is quite sunproof. The flowers are large, bold, and nicely placed on the stout stems. Vines are vigorous and free flowering over a long season. **½oz. 60 cts., oz. $1, ¼lb. $3.50.**

EARLY VOGUE. This variety is an improved Early Lavender. It is a selection of the popular lavender Early Harmony. The flowers are large and well placed on long, stiff stems, and most of them carry four blossoms. In our opinion this is the best lavender ever introduced, and we feel that it will become very popular with the florist. The vine is of very vigorous growth and very floriferous. **½oz. 60 cts., oz. $1, ¼lb. $3.50.**

MAJESTIC ROSE. An immense, deep brilliant rose-pink similar to Zvolanek's Rose but of a richer, deeper tone. The color is more evenly diffused than in any other Sweet Pea in this color-class and lacks the white at the base of the standard and wings which others of this color have. In growth, length of stem and size of bloom it excels all other Early Sweet Peas. **½oz. $1, oz. $1.50, ¼lb. $5.**

½oz. 60 cts., oz. $1, ¼lb. $3.50

EARLY BLUE BONNET

An extra-large, fine deep blue, the color being evenly distributed with not the slightest trace of mauve. Far superior to any blue on the market, having very long stems with four blossoms to a stem.

½oz. 60 cts., oz. $1, ¼lb. $3.50

EARLY SUNRAY *{Long-stemmed}*

The blooms are brilliant, glowing, yet soft cerise, on cream ground with just a suspicion of orange suffusion. The color is exceptionally clear, running evenly to the edges of the petals, and both standards and wings are of the same shade and even the keel shows some of the same color. Its stems are phenomenal in length and stoutness, many 16 to 17 inches in length, and they continue to hold their length long after most other varieties have become shortened.

½oz. 60 cts., oz. $1, ¼lb. $3.50

EARLY BELLE

This variety has large, bold, well-formed flowers, beautifully placed on unusually strong stems which are retained until late in the season. The color is a clear rose-pink on deep cream ground, and is laid on evenly on both standards and wings, showing, however, an intensification of cream at the base of the standards.

½oz. 60 cts., oz. $1, ¼lb. $3.50

EARLY PRIDE

A welcome addition to the long-stemmed varieties which have recently been introduced, and which are now finding so much favor with commercial growers and florists. Early Pride is a pure cerise of most even coloring, deeper in shade than Early Sunray, with large flowers, well placed on long stiff stems. In tests we have found that four flowers to the stem were the rule, rather than the exception. The flowers are well frilled and are borne in profusion. If growers will think of a long-stemmed, large-flowered, brighter Glitters, they will have a picture of Early Pride.

½oz. $1.25, oz. $2, ¼lb. $7

EARLY MARINE

This is the clearest of all blues and is a truer blue than even Mrs. Tom Jones and a bit deeper in color. Both standard and wings carry this blue evenly throughout the entire flower. The bold blooms are enormous, the standard measuring fully 2¼ inches across, and they are well placed on very strong stems. Plants are most vigorous and are prolific, giving a great abundance of blooms over a long period.

½oz. 60 cts., oz. $1, ¼lb. $3.50

EARLY ORIENTAL

The deepest cream in cultivation today. Its stems are exceptionally long, some sprays measuring 16 inches and over, and it retains its length of stem until late in the season with no signs of shortening as do most of the other varieties. The flowers appear in fours, this being the rule rather than the exception. Its color is a clear, deep cream and though it is black-seeded shows not the slightest trace of pink, as do most black-seeded creams. The flowers are well waved and most of them have duplexed standards, making them appear of enormous size.

½oz. 60 cts., oz. $1, ¼lb. $3.50

NEWER VARIETIES OF SPECIAL MERIT

CITY OF PORTLAND. This and Hungaria are considered two of the most beautiful pink Cannas. The flowers are large in size and of a deeper pink than Hungaria. An excellent bedding variety. Height 3 feet. **75 cts. per doz., $5.50 per 100, $45 per 1,000.**

RICHARD WALLACE. While this variety is not new, it still remains among the best of the canary-yellow sorts. The habit of the plant is excellent. The flowers are very large and are borne gracefully above the foliage. Height 4½ feet. **50 cts. per doz., $3.50 per 100, $25 per 1,000.**

HUNGARIA. This variety is considered the ideal pink bedder. Flowers are large, in good trusses; color very much like that of the Paul Neyron rose. King Humbert Canna

EUREKA. Canna hybridizers have worked patiently ever since the time of the introduction of the modern Canna, which bears such little relation as regards beauty of foliage and size of flowers to the old Indian Shot of bygone days, to produce a pure white. In offering Eureka we feel that our patrons are using the best all-round white variety for general mass planting or bedding. Height 4 feet. **60 cts. per doz., $4 per 100, $30 per 1,000.**

MRS. PIERRE S. DU PONT. Without a doubt this variety is the leader of all Cannas in the pink section or, for that matter, of any other color introduced up to the present time. The foliage is of truly tropical effect, being very broad and long, dark green in color, and offers a beautiful foil for the gigantic trusses of bloom. The color is best described as watermelon-pink, and the individual flowers are large, forming an immense head. Height 4 feet. **$3 per doz., $20 per 100**

THE PRESIDENT. In color, a rich, glowing scarlet, and the immense, firm, rounded flowers, 7 inches across when open, are produced on strong, erect stalks well above the large, rich green foliage. The President is superior to any other red variety in quantity and quality of bloom, and the firm flowers resist drought and heat to a remarkable degree. Considered the finest Canna ever produced. Height 4 feet. **60 cts. per doz., $4 per 100, $30 per 1,000.**

Primulinus Hybrids

The flowers were larger, more open, retaining their graceful placement on the spikes and also their beautiful range of artistic colors. Our Hybrids range in color from pale sulphur-yellow-apricot to the deepest chrome-yellow and excellent shades of orange as well. **40 cts. per doz., $3 per 100, $25 per 1,000.**

CHOICE CACTUS DAHLIAS

We offer below a choice list of Cactus Dahlias which have proved to bloom well under varying conditions. They are all excellent cut-flower varieties, as well as splendid varieties for garden decoration. While numerous Dahlia enthusiasts are growing the Decorative type of Dahlias on account of their massiveness, the Cactus Dahlia is still preferred by many flower-lovers on account of its artistic appearance.

Ambassador. An outstanding Dahlia at many of the Dahlia exhibitions, and considered by many as being one of the best and most artistic of recent Dahlia introductions. Its color is, perhaps, best described as a soft yellow at the center, with salmon, amber, and pink shadings, gradually deepening towards the tips. The flowers are of largest size and are set just right on perfect stems. A strong grower and free bloomer. **35 cts. each, $3.50 per doz., $25 per 100.**

Cigarette. Very fine scarlet, tipped white. A free-blooming variety with flowers held erect on long, stiff stems. **50 cts. each, $5 per doz.**

Countess of Lonsdale. The best-known and the most desired of all the Cactus Dahlias. It is of the older Hybrid Cactus type, with broad, straight, pointed petals of a deep salmon-red color, and is a very abundant and continuous bloomer. If only one Cactus Dahlia could be had, ninety-nine people out of a hundred would select this one. **25 cts. each, $2.50 per doz.**

Daddy Butler. Color, attractive combination of rosy carmine with lighter reverse. An early and free bloomer on perfect stems. **50 cts. each, $5 per doz.**

Dusky Belle. Very deep dark maroon, almost black, making all the shades of the dark Dahlias in the garden seem light in comparison with it. Fine long stems. Vigorous grower and profuse bloomer. **75 cts. each, $7.50 per doz.**

Ethel T. Smith. Enormous flowers held erect on splendid stems; lemon-yellow shading to white. Very popular. **35 cts. each, $3.50 per doz.**

F. W. Fellowes. We consider this one of the best Cactus varieties ever raised. The flowers are of unusual size for the long, narrow-petaled type, and of intense coral-red with deeper suffusion toward the center. A leader in this type at all Dahlia exhibitions or for the garden. Excellent as a cut-flower. **50 cts. each, $5 per doz.**

Mrs. Edna Spencer Cactus Dahlia

Glen Cove Beauty. A cross between Ambassador and Mrs. John T. Scheepers, retaining the good points of each. Same color as Mrs. John T. Scheepers—chamois, edged pink. Fine, large flower. Cane-like stems. Vigorous grower and free bloomer. **75 cts. each, $7.50 per doz.**

Eagle Rock Gem. Maize-yellow, shading to Oriental pink. A very fine strong-stemmed Cactus Dahlia. Color very unusual. Good habits, flowers always erect. **75 cts. each, $7.50 per doz.**

Eagle Rock Jewell. One of the most beautiful colors in any Dahlia—cream, overlaid cameo-pink. Flowers are very large and borne on strong stems. Vigorous growth; free flowering. **75 cts. each, $7.50 per doz.**

Eagle Rock Sunshine. In a class by itself. The flowers, of a very fine shade of deep yellow, are very large and are held perfectly erect on long, strong stems. It shows no tendency to become pendent, even under the most unfavorable conditions, and produces blooms full to the center until frost. It is unquestionably the finest yellow Cactus Dahlia. **50 cts. each, $5 per doz.**

Elkridge. This large, pure white variety is of fine form and great substance. It flowers very freely on long, strong stems. Has won many prizes. **75 cts. each, $7.50 per doz.**

Lorna Doone. Splendid incurved Cactus, yellow at the base, changing to pink tinted rose; fine upright growth and stiff stems. **50 cts. each, $5 per doz.**

Mrs. Edna Spencer. This Hybrid Cactus Dahlia has flowers of a delicate and exquisite shade of orchid-pink. Very beautiful and of good formation with strong stems. **35 cts. each, $3.50 per doz.**

Red Cross. Immense, brilliant scarlet and gold flowers held aloft on very long, straight stems. A great prize-winner. **50 cts. each, $5 per doz.**

Made of strong, weather-proof paper. Hotkaps are quickly placed in position over newly sown seeds, or newly transplanted seedlings, by means of a "Setter," and they are fixed by drawing a little soil around the edge.

They insure against damage by late spring frosts; they protect against wind, rain, and hail; they guard against insects. By the use of Hotkaps, crops may be matured sooner and an early market secured.

Protect tomato plants, pepper and eggplants with Hotkaps. Corn may be sown earlier and will yield sooner with their help. Cucumbers, muskmelons, pumpkins, and squashes grow quickly and are shielded from borers.

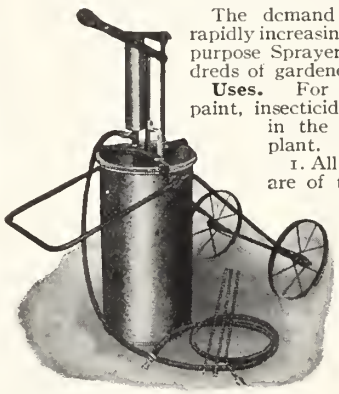
COMPLETE OUTFIT—CAPACITY 12 GALLONS



The demand for this portable Sprayer is rapidly increasing. The efficiency of this general-purpose Sprayer is finding favor among hundreds of gardeners, florists, and poultrymen.

Uses. For handling whitewash, cold-water paint, insecticides, fungicides, and all solutions in the garden, greenhouse, or poultry plant.

1. All the valves used in the Paragon are of the latest approved self-seating type and are made of solid brass.

2. The air chamber is of all brass and of sufficient capacity to insure a steady spray of high pressure when the pump is operated at a moderate speed.

3. The pump cylinder is cast of special metal, is accurately machined, and will outwear several ordinary pump cylinders.

4. The Paragon agitator is of galvanized iron, positive in action, keeping the solution thoroughly mixed.

5. The circular strainer on the end of the suction pipe contains 16 square inches of strainer surface and is automatically cleaned by the all-metal agitator at each stroke of the Pump. This combination insures the non-clogging of the Paragon, and is the greatest improvement made in Spray Pumps.

Equipment.—10 feet Special Spray Hose; 7½ feet Extension Pipe; 1 Mist Nozzle; 1 Steel Cap; 1 Straight Spray.

Galvanized tank, capacity 12 gallons, with truck, 16-inch wheel. Shipping weight, with truck, crated, 60 lbs. $19.50.

BARCLAY PLANT TUBS

The Most Moderate-Priced Tubs for the Florist

Many plants, large and small, are more attractive, more easily handled and bring better prices when planted in tubs instead of pots. Our Barclay Tubs have been made to compete in price with the very lowest-priced tubs on the market.

The tubs have strong, welded hoops, except the bottom hoop, which is flat; and are very durable. Unlike pots, they do not break, and plants do not require special packing when shipped.

The tubs are made of choice, well-seasoned white cedar, painted green on the outside, and finished with a round bevel.
